

# SKID STEER BUCKETS

**Heavy-duty Arrow Skid Steer Buckets** are made for all-weather digging and moving dirt, fertilizer, and other material. The radiused bottom with square, reinforced heel is great for back-dragging. The four bottom skid plates and two side plates provide added durability. Additionally, the low-profile design allows for increased visibility. All Arrow Skid Steer Buckets are predrilled to allow optional bolt-on reversible cutting edges.

#### **Built to Last**

Four bottom skid plates and two bucket endplates resist wear.

#### **Heavy-Duty Durability**

Reinforced bucket construction adds strength and durability.

#### **See More, Be Safe**

Low-profile design allows for increased visibility.

**NEED A DIFFERENT  
BUCKET?**  
WE HAVE PLENTY

- Stand Up Buckets
- Mulch Buckets
- Grapple Buckets
- Fork Mounted Buckets
- Telehandler Buckets
- Bucket Accessories
  - *Cutting edge*
  - *Spill guard*
  - *Bucket teeth*

PART NUMBER	INSIDE WIDTH	OUTSIDE WIDTH	CUBIC YARD	CUTTING EDGE	WEIGHT

# BUCKET ACCESSORIES

Hard jobs that involve dragging, sliding, and excessive friction will damage cutting edges and teeth over time. It is far less expensive to replace the edges and teeth than the entire bucket.

Spill Guards protect the machine and operator from bucket debris spilling over the back of the bucket while extending the height of the bucket. Added bonus -- extending height results in greater cubic capacity.

### Extend the Life of Your Bucket

Replace teeth and edges versus entire buckets!

### Increase Features

Adding a spill guard protects machine and operator from debris spillovers and increases cubic capacity at the same time.

### In Stock, No Waiting

Minimize downtime with in-stock inventory of all Arrow bucket accessories.

230WO - Short Shank Adapter
