

LOG SPLITTER

Get more out of your auger drive investments with the Arrow Log Splitter. This attachment is perfect for breaking down felled trees and large logs into manageable-sized pieces. The single-piece conical design draws in the drill as it rotates, splitting the log in two. For larger logs, the splitter can be repositioned so that the entire log can be split lengthwise. Measuring 7" in diameter and 11.8" in length from base to drill tip, the Arrow Log Splitter is compact yet powerful. It's also designed to prevent from overheating during continuous use, therefore, preserving the seal of your auger drive.

FEATURES

- Works with most standard skid steer and excavator Auger Drives (2,200 – 11,000 lbs./1 – 5 mT)
- Ready to use on 2.562" drives
- Log Splitter Adaptor available for 2" Hex drives
- Quickly splits logs into manageable sizes
- Robust build with single-piece conical design
- 7" diameter; 11.8" length from base to drill tip
- Weighs 32 lbs.

AD-30-36-20-R-UN	2.56" RND	up to 30 GPM flow	from 4"- 36"

Do more than just drill. You know that the Arrow Auger Drive can be fitted with a variety of Arrow Auger Bits, but it doesn't stop there. You can also remove stumps with the Arrow Stump Planer and mix cement with the Arrow Cement Mixer. This drive features a high-performance motor for consistent clean holes and low maintenance.

Holed Steady

The steady rotation of the drive leaves holes free of excess debris.

Dig Deeper

The sealed, planetary gearbox keeps debris out and maintenance minimal.

More Than Just a Drill

With our Stump Planer and Cement Mixer, the Auger Drive does so much more than drill.

- » *Made to withstand daily wear and tear.*
- » *The cradle holds the auger steady during travel and while dislodging dirt.*
- » *Universal quick-attach coupler mounts onto most skid loaders.*
