

# FORKLIFT LASER GUIDE

The Forklift Laser Guide product from OEA Safeguard will help reduce product damage and minimize product loss by providing operators with a visual light when picking up and placing a load. It comes in your choice of either red or green lasers. The fork laser guide has a lithium battery which lasts up to 50 hours. It also comes with an on/off remote control to extend battery life. It's easy to install with magnets to allow you to place the unit in visible but protected location. Competitively priced, the Forklift Laser Guide will save your company money and minimize product loss.

## FORKLIFT LASER GUIDE
